The utilization of Esoteric (Old World) knowledge and (New) Human Technologies that enhances the Mind, Body, Spirit connection, allowing for a greater effect than the sum of the individual components, with proven results through empirical science.

What does Psinergy offer?

Psinergy offers a range of services, primarily Esogetics based therapies that combine the energetic principles of Chinese Medicine with modern discoveries through biophysics.

What is Esogetics?

Esogetics is a well respected and fully recognized modality in Germany that was developed over 35 years ago by a German naturopath and scientist by the name of Peter Mandel.

"Esogetics" describes a healing method and a paradigm which combines the words, as well as the ideas, of 'esoteric' and 'energetic.'

Mandel's Esogetics therapies are based on a combined understanding of ancient esoteric principles regarding healing (notably the Hermetic Doctrines) and a knowledge of energetic systems derived from traditional Chinese medicine and modern biophysics.

In a sense, you could say Esogetics combines the Old-World knowledge with the New-World

How does it work?

Esogetics has seen that our physical and emotional pains (conflict, stress, and any form of 'dis-ease') are important signals of deeper disharmonies in the psyche and spirit that disrupt healthy communication all the way down to the cells of the body. In order to obtain a true freedom in physical and mental health, these "core" issues must be resolved and processed, allowing for better, more effective communication on the cellular level through to the spiritual level.

Fact: Announced in 2003, the University of Wisconsin conducted a trial study on cancer patients utilizing a light technology developed by NASA to grow plants (utilizing Red and Infra-red light LEDs). They found that this light array helped ease and even prevent pain associated with the cancer treatments and bone marrow transplants! These lights were utilized for one minute, once per day, for 2 weeks. Esogetics has been doing similar things with the Infra-red and red wavelength frequency spectrums for over 35+ years.

technologies allowing for a more profound, and synergistic effect.

Esogetics has decades of empirical scientific research and hundreds-of-thousands of people around the world have found a profound benefit from these fantastic life changing therapies.

"We know today that man is essentially a being of light, and the modern science of photobiology is presently proving this. In terms of healing, the implications are immense.

We know, for example, that light can initiate, or arrest, cascade-like reactions in the cells, and that genetic cellular damage can be virtually repaired within hours by faint beams of light. We are still on the threshold of fully understanding the complex relationship between light and life, but we can say now, emphatically, that the function of our entire metabolism is dependent on light."

--Prof. Dr. Fritz Albert Popp, world-renowned Biophysicist and medical researcher

Fact: The human body gives off a faint light a.k.a. photons. Don't believe me? Do a Google search for: "humans glow" and you will find many mainstream news and accepted science research articles.

We realize that light/photons are the native language and communication means for the body (cells) and spirit. Through the use of specific light frequencies (and wavelengths), we are able to introduce new, correcting information to the body/spirit (in very much the same way that we are able to reprogram a computer), allowing for the body/spirit to work how it is supposed to optimally.
